RING MECHANISMS

I-RING II

Save Our Earth. Save Your Cost.

PROTECT THE ENVIRONMENT

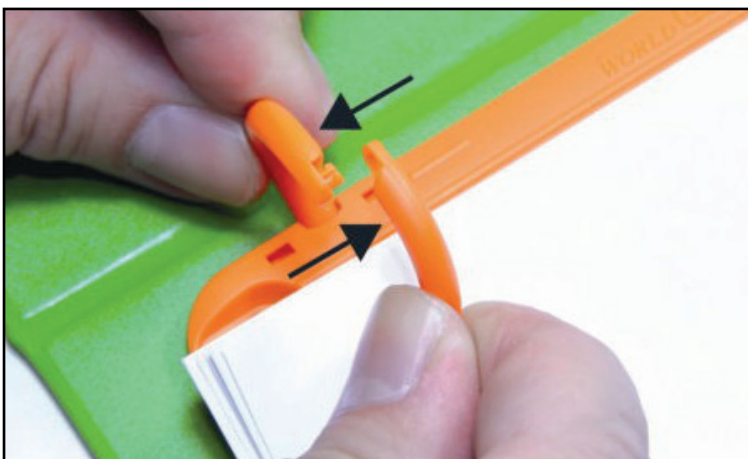

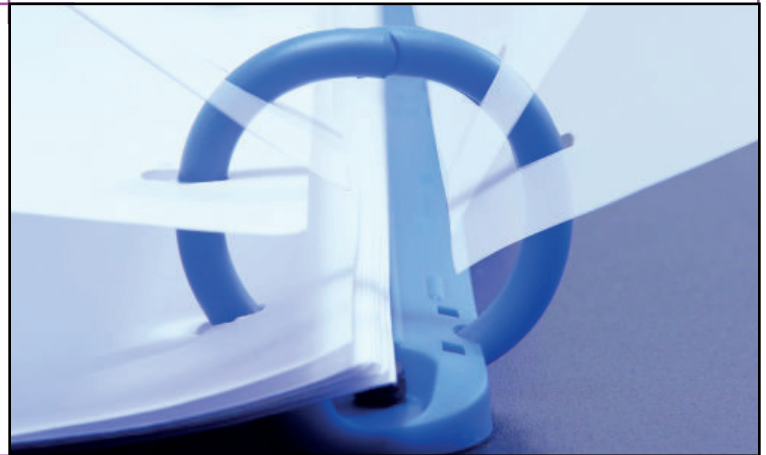

The steel metal parts can be easily separated from the plastic components, facilitating recycling.

COST SAVING

The plastic structure restricts shipping prices and production.

MECHANISM RING

The large diameter ring allows you to enter reams largest and browse easily.

LOCKING RINGS

The new design allow you to close the rings easily and have more resistance.

EASY TO ASSEMBLE

Inside the plastic frame has been added a small steel plate. The process is made easier thanks to the lifting magnet.
