

The EZ Touch Series

Variety of Choices - Equipped with the patented 'Snag-Free' ring mesh, the 'EZ Touch' series will be available with different paper capacities, different housing widths and different ring shapes to cater for the users' diverse needs.

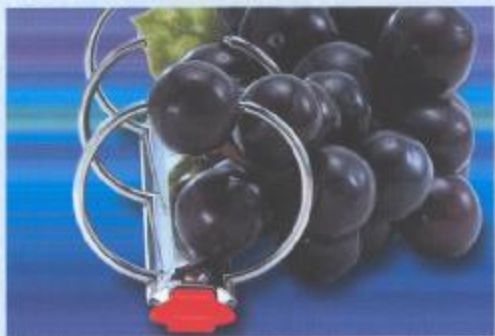

Flush Mounted Button - The low profile button is almost flushed with the top of the housing and this allows paper to lay flat on the button without any hindrance by the length of the paper or the misaligned holes. In essence, it provides more flexibility to users.

Built-in Locking Mechanism - Once you snap close the ring metal, it is locked automatically. You can sit back and relax without worrying that the rings will be opened with papers scattering around when the file is dropped on the floor accidentally.

Safety Rings - The exclusive design of soft closing force makes 'EZ Touch' models safer to use than other conventional ring metals, even though you misplace fingers in between the mesh of the rings, and snap close the ring metal.

Color Matching - The plastic button can be molded in different colors to match with the color theme of the binder/folder cover and to create a trendy and cyber look.

The EZ Touch Series

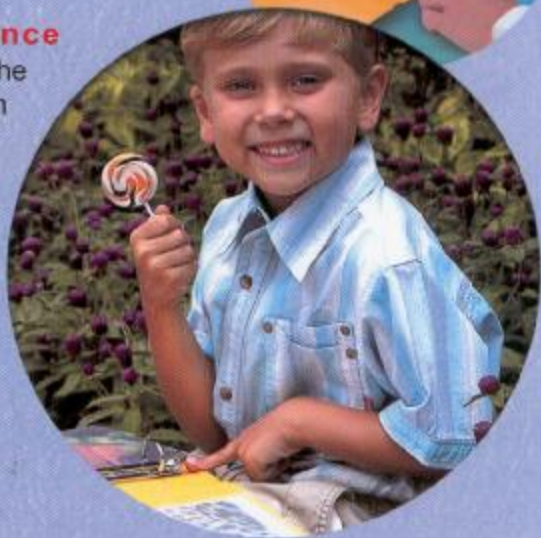

*Even ladies and kids
can handle it with
only ONE touch!*

User Friendly Design - Instead of twisting your wrist to press down the boosters at both ends like the conventional design, you can use just one finger to touch on the single button at any angle for immediate release, as simple and natural as that.

Save Time & Enhance Efficiency - While turning the papers or retrieving them smoothly by using only one hand, you can use the other hand to handle other things freely.

Easy to Open - With the exclusive design, less open force is needed and even ladies and kids can open it easily.
